

VIVEK HEGDE

Frontend Developer | React.js & TypeScript

Bengaluru • +91 8277338780 • vivekhegdehalasarige@gmail.com • [linkedin.com/in/vivek-hegde-](https://www.linkedin.com/in/vivek-hegde-)

SUMMARY

Frontend Developer with 3+ years of experience building scalable React.js/TypeScript SPAs, now expanding into full-stack development across the JavaScript ecosystem (Node.js, Express.js) with growing experience in Java Spring Boot and PostgreSQL. Also working in micro-frontend architecture (Module Federation) — led development of a component library published to NPM, and optimized a team-wide micro-frontend setup now used as the standard structure across the codebase. Proficient in Redux Toolkit, RESTful API integration, and modern testing practices (Jest/Vitest).

SKILLS

- **Technology Stack:** React.js | TypeScript | JavaScript (ES6+) | Redux Toolkit
- **Architecture:** Micro-Frontend Architecture | Module Federation (Webpack)
- **Backend:** Node.js | Express.js | Prisma ORM | PostgreSQL
- **Styling & UI Frameworks:** CSS | HTML | SCSS | MUI | Tailwind CSS | Bootstrap
- **State & Data Flow:** Thunk Middleware | Redux Saga | RESTful APIs | Axios
- **Testing & Quality:** Jest | Vitest | React Testing Library (RTL) | Unit Testing
- **Development Practices:** Agile Methodologies (Scrum) | Git | Version Control | Code Review
- **Additional Skills:** Webpack/Vite | npm | Performance Optimization
- **Languages:** English | Hindi | Kannada

EXPERIENCE

Software Engineer — NSP

May 2023 – Present

- Built and scaled a production React/TypeScript SPA, applying code splitting and lazy loading to improve load performance
- Contributed to migrating the Assisto HRMS platform to a micro-frontend architecture using Webpack Module Federation to expose/consume remote apps from the host; optimized the initial setup established by the tech lead, and the refined structure is now the standard adopted across the team's codebase
- Recently began contributing to full-stack development on the Assisto platform, building backend services with Java Spring Boot microservices and a multi-tenant PostgreSQL database, alongside the existing React/TypeScript frontend
- Led development of a reusable React/TypeScript component library published to NPM, reducing development time for new features across the team
- Implemented state management (Redux Toolkit, Thunk) and integrated RESTful APIs (Axios) for dynamic, data-driven UI
- Delivered responsive interfaces using SCSS, MUI, Tailwind, and Bootstrap; wrote unit tests with Jest/RTL to maintain component reliability
- Maintained code quality through Git-based version control, pull request reviews, and Agile/Scrum delivery practices
- Progressed Trainee → Associate Software Engineer → Software Engineer; delivered enhancements and bug fixes on ABB's Product Dashboard Management system

EDUCATION

- Master of Computer Applications (MCA) — Jain University, Bengaluru | January 2026
- Bachelor of Computer Applications (BCA) — JMJ BCA College, Sirsi | November 2022

ACCOMPLISHMENTS

- **Performance Excellence Award (2024–2025, 2025–2026):** Recognized in two consecutive cycles for consistent, outstanding performance and delivery of high-quality results
- **Rising Star Award:** Awarded for exceptional commitment, hard work, and significant impact in the role
- **Collaboration Award:** Honored for seamless teamwork, effective communication, and joint delivery of results
